

THE ARTIFICIAL INTELLIGENCE (AI) SERIES

Association of Arbitrators (Southern Africa) NPC

Webinar

presented by

USE OF TECHNOLOGY AND AI IN CONSTRUCTION - A DELAY EXPERT'S PERSPECTIVE

Join the **Association of Arbitrators (Southern Africa) NPC** for the first webinar, presented by **Elixa Experts**, in a series as part of the Association's ongoing mission to provide regular upskilling opportunities for everyone interested in Alternative Dispute Resolution (ADR).

ABOUT THIS WEBINAR:

Unlock the future of construction project management with our expert-led webinar focused on the transformative impact of technology and artificial intelligence (AI) in the construction industry. This session explores how emerging technologies are reshaping the construction landscape — and what that means for delay analysis and dispute resolution. Find out more about how new technologies like drones and 3D printing are driving the improvements and also enhancement of data. Learn how AI works, how it evolved to the widely used Large Language Models and how these fit into the broader picture. Discover both the opportunities and risks these technologies pose for legal professionals. Whether you're a contractor, a project manager, a construction consultant, a legal professional or an insurance professional, this webinar will provide a practical, non-technical guide to understanding AI in the context of construction disputes — equipping you to engage confidently with expert evidence shaped by next-generation tools.

ABOUT OUR PRESENTER:

Ilke Şahin Goler:

With over 19 years in the construction industry, Ilke is a seasoned civil engineer and delay analyst, renowned for her expertise in forensic construction programming and delay practices. She gained on-site experience on international projects in the Middle East. Holding an MSc in Construction Law and Dispute Resolution from King's College London, she has been a forensic delay expert on projects including airports, commercial developments, power stations, and transportation. Ilke also published papers and spoke at conferences on delay analysis and construction disputes. Ilke translated a key document in the field, the SCL Delay and Disruption Protocol, to Turkish in collaboration with SCL Turkey.
